## PLASTICISER

REVISED: JUNE 2005

### DESCRIPTION

Bondall Plasticiser is an additive which when mixed with a cement mortar allows greater workability and can be used as a partial or complete replacement for lime at a fraction of the cost.

Note: use yellow "fatty" sands for best results.

### FEATURES AND BENEFITS

- Allows greater workability of mortar
- Cost effective

### APPLICATION

- Add Bondall Plasticiser into the batching water at a rate of (1 part Plasticiser: 200 parts water).
- Check speed of mixer. A fairly fast mixer gives the best results.
- Add water, sand and cement to mixer and mix until desired workability is obtained.

### CLEAN UP

Clean all equipment promptly with mineral turps, followed by warm water with a little detergent and a fresh water rinse immediately after use. Do not pour contents or washings down drains or sinks. Dispose as per your local council regulations.

### SIZES

Available in 4 & 15 litre

### PRECAUTION/FIRST AID

It is recommended that normal personal protective clothing should be worn, including coveralls, impervious gloves and goggles. Avoid unnecessary skin contact and inhalation. If swallowed, contact a doctor or the Poison Information Centre on 13 11 26. Give a glass of water to drink and do not induce vomiting. A Material Safety Data Sheet is available on request.

### DISCLAIMER

The information contained here is given in good faith and is intended to be of assistance to users. The performance of this product is dependant upon its correct preparation, application onto a sound surface and attention to the instructions on the label. The wide variety of surface conditions makes it impossible for the company to assume liability for any loss, consequential or otherwise, arising from the use of this product. Should the product be found defective our liability shall be limited to the replacement of the product only. We reserve the right to amend specifications and application techniques without prior notice.
